

I am distressed with your efforts to stifle XM radio. Satellite radio is something we enjoy, and it provides quality programming, news, and weather that is most valuable to us not only in our home, but when traveling acrossed our country. XM is provided by subscription service, and is paid for by us the consumers. You have no right to prohibit the folks at Xm the constitutional right to broadcast. We repsectfully request you reject the Nab's petition 04-160, and support XM's ability to prvide the programming we demand and deserve.
